

October 20, 2009

Dear parents/Guardians:

I know that many of you are concerned about the H1N1 flu virus. To date our school has one confirmed case of a student with H1N1 symptoms. There are a few other students absent with Flu symptoms.

Hopefully you have taken the time to read our previous letters regarding the H1N1 flu and flu precautions. I continue to stress the importance of knowing the signs and symptoms of the flu and following flu precautions. If you need a copy of this information please do not hesitate to contact me.

We will continue to monitor flu conditions and make decisions about the best steps to take concerning our students. However, it is very likely that you and your child could be exposed to this virus anywhere.

Should you have any questions in the meantime, I encourage you to speak with your family physician, to refer to the center on disease control website www.cdc.gov or to call me here at school.

Thank you,

Juliette Jones RN
School Nurse
