

The Common App

The common application for college is preferred by many colleges. It is an application in which the students can fill in their demographics and personal information one time and have it sent to many schools instead of filling out several separate applications. Along with students only having to fill it out one time, it also allows me to upload their information just one time to colleges they selected.

The common application can be found at: www.commonapp.org

Financial Aid

All students planning on attending college will need to fill out a FAFSA application online at fafsa.gov. Applications are available from October 1 through June 30th. I will assist if students and parents need help.

Scholarships

Students are encouraged to go to www.scholarships.com and www.fastweb.com and fill out a student profile to see what scholarships would be applicable to them. You can also download the scholly app from the app store for additional scholarships

Also if a scholarship comes across my desk that is applicable to you, I will get it to you along with all of the directions on what you will need to do
